

Features&Functions:

1. Strong tight spring bold compacting device, fine compact structure has a long service life
2. Thicken the chassis to make the use more stable
3. Built-in sealing ring, no oil leakage
4. Control knob rotation can adjust the jack to lower
5. Fuel filler after pulling out the piston, add hydraulic oil
6. Non-wear technology of oil cylinder the inner cylinder is equipped with two sets of imported wear rings and the piston rod floats. The piston rod on the wear ring does not contact the inner cylinder
7. Integrated claw hook the whole claw hook is cut directly from the steel plate. High cost, durable and not easy to break
8. Portable handled ergonomic design easy to carry
9. Wooden packing safer and stronger wooden box packaging
